ANNUAL REPORT 2014-2015

WE CARE. WE SHARE.

A Voice from the Heart...

We have come a long way. 18 years of hard work and dedication has culminated into our successful settlement in society. We continue to carry out our vision of serving the underprivileged for decades to come.

It gives me great pleasure to bring to you the 18th Annual Report (2014-2015) for SMILE. This year too we've had our lion's share of achievements. Our most notable success came in our endeavour of the E-Education project that we took up last year. Our other achievements include various academic and sporting accomplishments made by our children. We also continue to bring more children under our umbrella, increasing the number of families that we help, and increasing the initiatives that cater to our family members.

I am pleased to let you all know that so far we have successfully sponsored over 101 UDAAN children, two rural projects in Ratnagiri District (Panwal Village), one school in Wada (Thane), and four schools in Gujarat.

Our ceaseless efforts over the past 18 years have given us remarkable outcomes. We now see a remarkable transformation in the outlook of our children. With the right input and desired support, we have been able to raise our children's confidence and self-esteem so that they can continue to work towards becoming the next generation of engineers, doctors, and chartered accountants.

Project UTKARSH has seen triumph over leaps and bounds. Our women have now become confident enough that they don't need assistance to take the necessary steps forward in life. Examples of this newfound confidence can be seen in their health, income and public speaking. No matter the circumstances, our women have not looked back.

Yours sincerely,

Mrs. Anaxi Shah
President

About Us

You have known us for over 18 years now. SMILE is a registered charitable organization whose mission is to work with underprivileged children and their parents. We continue to groom personalities and change lives for the betterment of those children and the families that we work with.

Since SMILE was found in 1997, we have worked with thousands of families, underprivileged children and women, senior citizens, and also many urban and rural schools in Gujarat and Maharashtra.

SMILE is a platform for enlightening as many as we can through our projects UDAAN, UTKARSH and UMANG.

UDAAN, a project started in 1997, is oriented towards children with its core motive of making them settled and happy individuals. In this process of shaping their careers, we hold ourselves responsible for their education, extracurricular activities, nurturing their talent, and providing opportunities and resources to help them advance in their chosen career path.

Besides basic education, we started our own Montessori school in 2003 for toddlers aged between 2 and 6 years old. Being the only Montessori school for underprivileged children in South Mumbai has given us an advantage of having a waiting list of 8 to 10 children each year. The struggle we initially faced to convince parents to get their little children educated from an early age has finally yielded fruit.

Women from lower socio-economic backgrounds are caught within the four walls of their homes. They are under a lot of stress from their household responsibilities but they still want to give their children the best education possible. Most of these women are illiterate or with limited elementary level education. They have time constraints due to multiple responsibilities on their home front. At SMILE we work around these constraints by teaching them skills that they can quickly master and readily apply to generate a sizeable and

About Us

sustainable income for themselves and their families. We aim to change their personalities through various workshops and programs. We also aim to make them physically fit through yoga and dance, and help them earn a respectable living through our Income Generation program.

Back in 2008, SMILE had started its initiative of catering to the underprivileged in rural India. Starting with one rural project in Ratnagiri, SMILE has now adopted 10 schools in Gujarat and Maharashtra, with nearly 4000 beneficiary students during the academic year 2014-2015. It has been one of our greatest achievements that is in sync with our values.

Our Mission

Caring enough to share what little we may have with the deprived and encouraging others to do the same; to create a Society Moved to Instil Love with Empathy.

SMILE with its core values rooted in the right direction with the right intensity at the right time has been in existence for over 18 years and continues to spread smiles on thousands of faces!

Our Objective

To work in close capacity with our target groups in order to enhance their overall development, extract their talent, and help shape their confidence. We eventually make them independent and self-reliant by providing educational support, rehabilitation, vocational courses and many other training programs.

The proposed project envisions bringing socio-economic transformation by educating less fortunate children.

Our Projects

MONTESSORI

UTKARSH

UDAAN

**Educational project,
Rural & Urban**

UDAAN

Project UDAAN began in 1997 with a handful of street and slum children. Today, this project works towards breaking the cycle of poverty by providing higher secondary education to underprivileged children. In our endeavour, we have successfully adopted and partnered with eight schools, with around 3500 impoverished children. UDAAN is a project that envisions bringing socio-economic transformation in the Indian society by educating less fortunate children.

Our Projects

At SMILE we do this by providing not only education, school fees and scholastic material but also a better environment, access to better healthcare, and exposure and opportunity to be recognized in public. We also organise workshops for talent development, entertainment activities, personality development and much more.

Being aware that children are our country's greatest resource, the UDAAN project intends to ensure and support children's complete development that is mentally, physically, socially, spiritually and economically, liberating and equipping them as they open up to their full potential.

SPONSORSHIP PROJECT

For hundreds of underprivileged children in India finding a job that pays well is close to impossible as they lack the skills required. Despite having intelligence and skills, they often even lack the language and presentation skills for desired jobs.

SMILE's Sponsorship Project ensures every child receives support through every phase of his or her young life. This project invites donors to help children swim through the hurdles of their lives. The funds raised through our Sponsorship Project helps a child by paying school fees, providing educational material like books, bags, stationery, and tuition classes. The overall development of the child is also supported by organising educational workshops, expert talks, outings, and hosting extracurricular activities like dance and karate. The Sponsorship Project also helps the overall needs of the family.

MONTESSORI

SMILE's Montessori school is the only Montessori school in South Mumbai for underprivileged children aged between 2 and 6 years old. Our Montessori school is based on the principles of Maria Montessori that cater to the practical and holistic based education. Started in 2003, we have close to 250 children who have graduated from our Montessori school to pursue further education. Even today we have a waiting list of 8 to 10 children each year.

UTKARSH

Women continue to be constrained by India's patriarchal society. Many have little or no access to education or basic health services. Though they are working hard all day to solve their family problems, they have often lost their own identity in this process. They no longer have any motivation or anything positive for themselves.

Project UTKARSH aims at training and providing such women with opportunities of self-employment to improve their socio-economic status, help them identify themselves and improve their quality of life. Efforts are made to empower women socially, culturally and economically. They are also provided with much needed space for leisure, entertainment and celebration. Several programmes are undertaken in this project.

RURAL DEVELOPMENT PROJECT

Children in rural India suffer from a lack of basic educational amenities, opportunities to learn and demotivated school officials. Even though they might be intelligent, the lack of resources weighs them down. Many even have to work alongside with their parents due to financial constraints. The parents themselves are sceptical as to whether their child will do better in school or not. Education is not given its due importance.

Our Projects

Through our research we found a lot of problems present in the rural education system. Convincing parents to let their children attend school, listening to the woes of school trustees, and observing the unwelcoming environment we were determined to make a change. Now we have successfully started two rural projects in Ratnagiri District (Panwal Village) and partnered with one school in Wada (Thane) as well as four schools in Gujarat. It has been a proud achievement that is also in line with our mission and goals for SMILE.

The bright side is that these children are street-smart; quick to absorb knowledge and hungry for more! School trustees who were previously disheartened by the lack of amenities are provided with all of the basic schooling facilities by SMILE. We aim to build a smarter India, one that gives a child the opportunity to shine as much as in rural villages as there are chances in urban cities.

UDAAN

UDAAN Activities

Academics

Additional Educational Support

As children progress in school, the difficulty level of their schoolwork increases. Students face higher amounts of tension, stemming from a pressure to cope with the faster paced school curriculum to peer pressure. Moreover the parents of these children cannot help them with their academic problems because they themselves are not very educated. But they dream of educating their children, for which they work day and night. It is this reason that SMILE started its Group Tuition Class to help children solve their difficulties.

When we started our project UDAAN in 1997, we first laid the foundation of providing education to street and slum children. We helped children secure admission to schools and helped them with their studies through our expert teachers. We also helped them with other hurdles ranging from language barriers, learning, and basic writing.

Today we have forty children regularly attending tuition classes run at SMILE's day care centre and at our administrative office. Students from Standard 1 to Standard 9 are taught across all mediums. For those who are appearing for their Board examinations, we have made sure to enrol them for private tuition classes, for extra help to secure a higher percentage. We conduct extra maths classes for our students to make them competitive in this increasingly challenging world. We also conduct English tuitions for our students, which provide them with a cushion to improve their command over the language.

Additional Group Tuition Classes for our children

Our teachers do more than just aim for improving academic performance. They also play a significant role in the shaping our children's future. The teachers guide them efficiently so as to raise their confidence level and accelerate their studying procedure. Additional attention is given as well as imparting knowledge and awareness to each child. Children discuss their ideas and opinions with more freedom in class. Hence it helps them explore different subjects thoroughly.

Learning is fun with Sachin Sir!

The result of these efforts is having our students pursue career options like engineering, medicine and the like. Moreover we have witnessed 100% pass results every year and 70% of children pass with above 80% marks.

Working with Schools

Since the very beginning, we have been associated with various schools of South Mumbai. These include Bhagini Kala Mandir (English), Our Lady of Dolors (English), Marwari Vidyalaya (Hindi), Aryan School (Marathi), Seva Sadan School (Marathi) and Sharda Ashram School for Girls (Marathi). We also have a close connection with Vikas Vidyalaya School which caters to the needs of deaf and mute children. Through this association we provide educational assistance in terms of books, school fees and stationery to the children going to these schools. These schools have been our partners since SMILE's inception.

Support for Children Belonging to Scheduled Tribes and Scheduled Castes

Since the past 8 years, we have been sponsoring scheduled tribes and scheduled castes from Seva Sadan and Sharda Mandir School from the primary and secondary sections. And in the last two years we added seven more schools in Gujarat and Maharashtra under our umbrella. We have Vahanvati Vidhyalaya, Takshashila Madhyamic Vidhyalaya and Saraswati Vidhyalaya from Gandhinagar associated with us.

At the above mentioned schools, we provide these institutes with necessary educational infrastructure to equip their library, laboratory, computer labs, etc. For the children; we provide them with school fees, stationary, uniforms, etc. The children are also provided with appropriate healthcare through our nutritional projects.

Programs During the year

Stress Buster Party

April is that time of the year when school kids feel stress free. Final examinations are over in almost all schools and the new academic session is yet to start.

"Laughter is the best medicine"
– Comic play

We too at SMILE treat the kids with time to relax and re-energize. A special Stress Buster Party is the tradition SMILE has been following for over 15 years. For the past two years this program is fully organized, managed, anchored and presented by the children's parents. The program this year was based on the theme "Comedy with SMILE". All the performances that majorly included role-playing were comic based. Moreover, to encourage the children's parents, this was a competition- entertainment program where

two winners were declared based on the best script and delivery of the act. That evening we only heard our children's giggles and laughter echoing through the hall. The children and parents were served with yummy snacks to satisfy their taste-buds!

Screening of Movie Bhootnath Returns

To fully utilise the study-free time, during the summer vacations, before the kids go back for their next academic year, we decided to gather all the children to showcase a movie. Movies when seen in a group are more fun than seen alone! As the saying goes; the more the merrier! This gathering for the screening of "Bhootnath Returns" was a perfect example to that saying. 29 children enjoyed the movie at the SMILE UDAAN Centre with hot popcorn!

Our Kathak dancers performing

Saturday Workshops

One Minute Games

"I blew 20, how many can you do in a minute?"

I don't think you can beat my record!

You will be surprised by what a child can get done in one minute when faced with an exciting challenge and an opportunity. We had some real fun when we presented various games to our children! Some of them included threading needles, moving Thermocol cups with blown balloons, and picking green peas with a straw while moving them from one bowl to other. It was a hilarious sight to see students on their toes and tension on their faces to win the games. Each child had a blast that evening!

UDAAN

Best out of waste

Our little masters busy at work

Creativity at its best

In order to make children aware of how they can reuse waste material and to teach them a lesson on reducing waste, 'Best Out of Waste', an eco-drive competition was organized for our students.

Little hands and imaginative minds came together in a creative burst of energy during this event. Mind-blowing and fabulous ideas were demonstrated by students. Right from waste CDs to old papers, trash can and broken bottles, every piece of waste material was used and the result was a hall full of projects made from recycled material!

Some of the items that our children made were airplanes from a plastic bottle, a dancing doll from a Colgate packet, a beach scene in a shoe

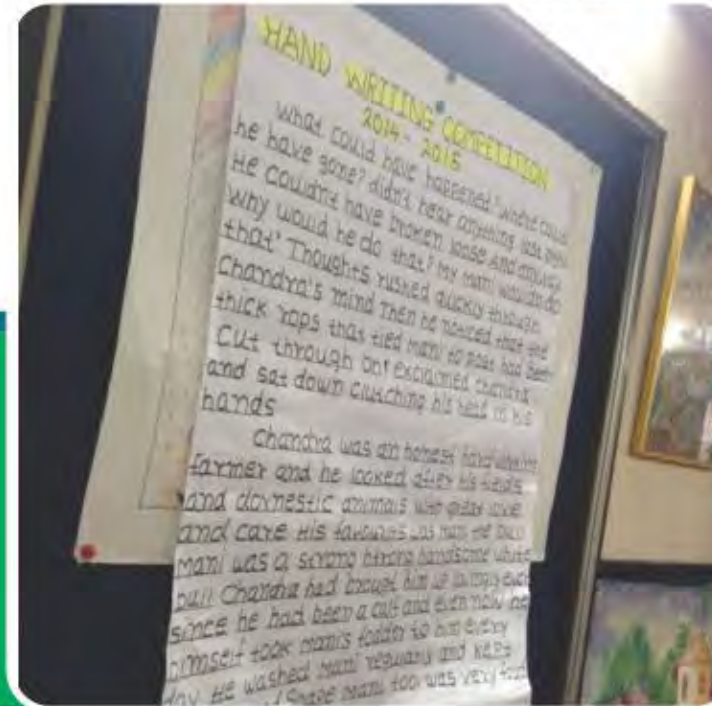

box, a pot from waste bangles, etc.

So the next time you are about to discard waste, think again; be creative and make the best out of your waste like our children!

Handwriting Competition

Handwriting Expert
Mr Anil Chauhan
addressing SMILE
children

Handwriting Competition for
SMILE children

What does your handwriting
say about you?

Handwriting is the reflection of a person's individuality. In today's culture, computers and printing make handwriting seem obsolete. Developing a child's handwriting skill is very important. All of our SMILE children enthusiastically participated in an English Handwriting Competition that was organized by SMILE under the judgement of Mr. Anil Chauhan who is an expert in analysing handwriting and also conducts many handwriting workshops.

Handwriting Workshop at BKM School

In today's age of technology that revolves around mobile phones, tablets, and laptops, children seem to want these cool gadgets as badly as they need food and shelter! In most advanced schools today, teaching is delivered through audio-visual aids. Children also tend to learn through apps on iPads and similar electronic devices. To highlight and bring the focus back to handwriting at such times, we organized a handwriting workshop at B.K.M. High School under the expertise of Mr. Anil Chauhan.

At this guest lecture organized by SMILE, Mr Anil Chauhan spoke about how handwriting has begun to lose its importance in education and today's society. He also spoke about the different ways right handed and left handed students write. He focused on techniques to have a specific grip over the pencil for neat handwriting. Formation of letters, writing in Hindi and English, and precise movement of the pencil were some other things he concentrated upon. It was an enlightening lecture for the students as well as the teachers of the school!

SMILE's extended workshop at B.K.M. School

Debate on "Technology –Advantages and Disadvantages"

"Honest disagreement is often a good sign of progress" - Mahatma Gandhi

With its emphasis on critical thinking, effective communication, independent research and teamwork, debate teaches skills that serve individuals well. Skills learned in debate can be used in school, in the workplace and in fulfilling children's responsibilities as citizens of democratic societies.

With the most loved topic of children, "Technology – Its Advantages and

Disadvantages," we were amazed to see different sides of the same issue. The children could very well prosecute and object their views on how technology has served them for the better or for the worse.

The competition started with a display of flashcards with missing words, which was then succeeded by the actual debate. Children spoke about every form of technology they were aware of, be it mobiles, laptops, rocket science and so on.

Puppet Making Workshop (4 weeks)

The traditional practice of employing puppets to educating children has been used in SMILE for the last two years. We have been conducting a four session puppet workshop whose aims are:

- ✔ To introduce the importance of puppets
- ✔ To teach preparation and manipulation of various materials to prepare a puppet
- ✔ To prepare educational scripts for puppet theatre
- ✔ To perform in front of an audience using the puppets and a script

Using Puppets as a Therapeutic Media

Each one displays their unique puppets

The emphasis of having this workshop is that children develop creative skills by forcing themselves to use their imaginations. They make up the roles, the rules, the situations, scripts and the solutions for each puppet. It is through imaginative play that children come to understand the differences between fantasy and reality.

Half the fun of putting on a puppet play comes in planning the performance. The last section of the workshop was based on a puppet theatre where each group showcased their puppets and enacted a role play based on it. It was beautiful to see what the children came up with.

Kite Making Workshop

Did you know?
Newspapers could fly too.

Engrossed in giving a perfect
finish to his kite.

Which colour should we use?

Will yours soar up to the highest heights?

This was the first time that we had a Kite Making Workshop for the children. Instead of distributing readymade kites to our children this year, we decided to have them make their own kites. Children made kites of different shapes, sizes, colours to compete for this competition.

Christmas Arts and Crafts Workshop

Santa Claus is coming to town!

Santa-Craft by little hands

One week prior to Christmas, all the children assembled at the centre for an Arts and Crafts Workshop. This workshop was more of a fun activity for children where they had to make things related to Christmas. There was also a prize distribution ceremony as part of the Christmas Day celebrations! The children brought their own material and we were amazed to see how beautiful and creative our children were through their hand-made reindeers, snowmen, Santa Claus paintings, etc.

Sweet Memories Camp

Sweet Memories has partnered with SMILE for the last three years. It has always been our greatest delight to have them as our consistent supporter. Like every year, our children were taken to a jungle in Vishnubag at Badlapur on the outskirts of Mumbai. After reaching the camp location, all of our children were treated to a yummy healthy breakfast, after which they went camping in the jungle. On the way they were shown different trees and taught their significance. The concept of artificial creation of an environment to show how rain drops are formed and how we get rainfall was amazingly done. Small clouds were made out of which water

UDAAN

fell in the form of rain on the children. They loved this bit of the adventure! Moving on, they were shown various animals; reptiles that crawled and birds that flew in the forest. After a tiring morning, they were served a scrumptious lunch, after which children rested and enjoyed the rain dance organized for them. Happy children came back home after celebrating Sweet Memories' 9th Anniversary! Water bottles, tiffin boxes, crayons and compass boxes as gifts added to their joy!

Sweet memory camp

Trent India – Reward and Recognition Programme

Trent India's Reward and Recognition programme at Taj President was one stage where everything came together for SMILE's little dancing angels. They felt everything at once – the music, the audience, the choreography! All the girls danced their hearts out at the opening dance performance of the event night, the return to which was a hall full of praises and applause. Everybody present in the hall was spellbound by their grace, synchronisation and the energy with which they performed. At this stage, the little girls were recognized and their talent was appreciated. The girls who performed were our Kathak girls, who are currently receiving training to become Kathak trainers themselves.

Opening Performance at Trent India's Reward and Recognition Program

UDAAN

Maa Tujhe Salam – Independence day Celebration by HR College

Our association with H.R. College stretches back to the past few years. Maa Tujhe Salaam was a fun yet educational program organized by the Rotary Club of H.R. College. The program started on the note of letting children know the importance of the day. They also explained to the children how significant Independence Day is in India by introducing the influential people and freedom fighters that are still alive who made this day a reality! This was then followed by some patriotic games.

Celebrating another year of freedom with H.R. College students

Teaching our children the importance of independence on this auspicious day

Festival Celebration at SMILE

Our children dressed as Lord Shiva and an Asura for the Ganesh Chaturthi skit

Our little actors on stage during our Ganesh Chaturthi skit

Janmashtami

Rakshabandhan

Since August happens to be the month of many Indian festivals, we decided this year to have one grand celebration of all the important festivals normally celebrated in the month of August. For this event, we combined Ganesh Chaturthi, Raksha Bandhan, Janmashtami and Independence Day all together. The program started with a welcome Kathak performance to Lord Ganesh. We had included various lighting effects to enjoy the performance! This was then followed by a skit where children depicted how a mouse became the vehicle for Lord Ganesha. The skit was followed by a traditional Koli Dance where all the boys and girls dressed up as Kolis and danced to entertain the crowd.

"Dilo Ka Rishta" was the name of a small stage show that highlighted the brother-sister

bond. It depicted a boy who did not have a sister. The play focussed on how empty he felt on not having a real sister but when a friend's sister became his sister, he felt more content. We had another play to show how Rakshabandhan celebration changed over the years.

For Janmashtami our children became little Kanhaiyas where they portrayed the mischief done by Lord Krishna, the Raas Leela and how Lord Krishna was successful in getting the butter all to himself!

Finally the celebration of Independence Day left children with a message of saving water, controlling pollution and making India a better place to live.

UDAAN

Wherever your story lands, we cannot deny that our parents are still our parents. Our mothers birthed us while our fathers supported us. They changed our diapers; listened to us cry, fed us, worried about us, and ultimately raised us. The only dream our parents live up to is see their children become successful in life. The children we have come from families that only have the bare minimum resources to survive. These parents give up their last coin of earning to educate their child. We have children who are raised by single mothers. Mothers who have worked hard and faced the cruel world to keep their child protected. These parents truly deserve some recognition if nothing at all.

For the very first time, we hosted this program for all our children who have been with us for years and are now in college and doing well. This program was for parents to know their children are thankful. At the least, admit that without them, children would not be here. Thank them for keeping us alive and making us what we are today.

Each parent received a token of appreciation from their children. The entire atmosphere was very emotional and all the women and children had tears in their eyes. The parents had never expected appreciation to this magnitude.

Our partner for over 12 years Inner Wheel Club of Queen's Necklace for the gift hampers!

Our partner for over 12 years Kirtiben Gheewala brought smiles to the faces of all our children

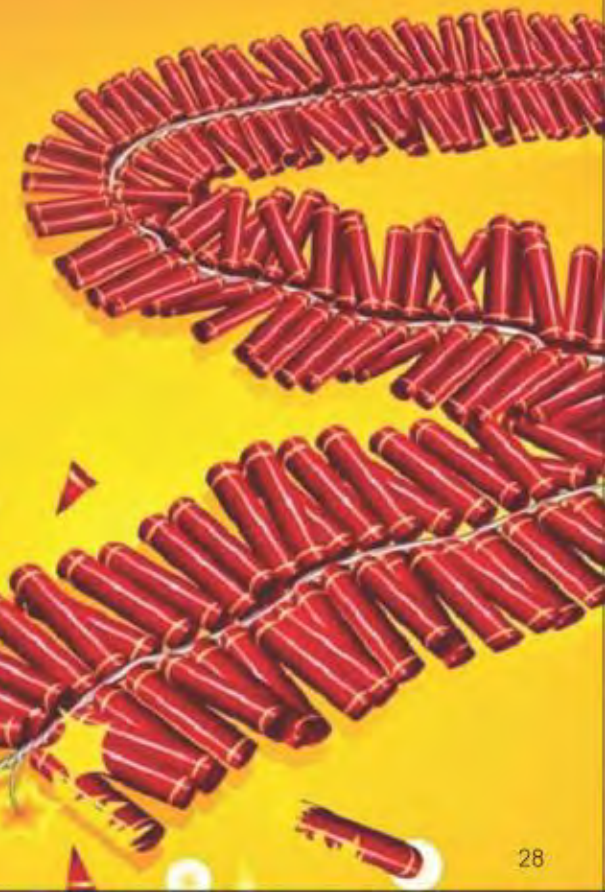

Diwali celebrations at SMILE were filled with plenty of excitement. The program started with a small Rangoli competition where the children were divided into groups based on their age. After the competition, all children performed small role-playing to depict the significance of celebrating Diwali and how it's important to our culture. They were taught how to celebrate a safe Diwali through play-acting. Every child was then given gift hampers and t-shirts from SMILE. All the winners were given a cash prize by the Inner Wheel Club of Queen's Necklace.

Our guests of honour were Kirtiben Gheewala and members of the Inner Wheel Club of Queen's Necklace.

Diwali Party

The winning Rangoli made by Ruchika Vanarase

Drawing Competition Organised by 'Creative Touch Team' at J.J. Institute of Applied Arts

J.J. Institute of Applied Arts had invited the children of SMILE to participate in a drawing competition that they had organised for the masses. All of our children were eager to participate in a competition of this level. The children were given three topics they could choose to draw or paint; Mother Nature, or Cleanliness is next to Godliness, or Each One Teach One.

All drawing and painting materials were provided to the children. There were games kept around the drawing and painting area for children to play with. These included Feed Me, Ring Games, Gun Shoot, Tattoo making, etc. All the children were geared up to finish their drawings and paintings. After the competition was over, a special magic show was arranged for everyone to enjoy. Our children had a great time at the JJ Institute!

Comedy Nights with Kapil Sharma

There's no denying the popularity of Kapil Sharma's show Comedy Nights with Kapil. Our children too were dumbstruck by the awesome comic timing Kapil and his team had. It was a once in a lifetime experience for our children when students from H.R. College had made arrangements for them to witness the show live at their set in Goregaon. All of our children jumped with excitement to see their favourites live in action. They were over the moon when they also saw the sets of some famous Bollywood movies.

We give special credit to the students of H.R. for choosing our children for the show. Moreover, we were overwhelmed by the treatment given to our children, right from picking them up at our office to dropping them back home.

Christmas Party Celebration

This year's Christmas was lighter, as most of our children had left to visit their native homes in order to celebrate the holiday. Among the remaining students, we had organized a small program where we sang Christmas carols, had a couple of dances, made some impromptu jokes and had lots of fun! All the winners of the craft competition were given their prizes and the children were given tasty food to munch upon!

Let's decorate our class with Santa and his goodies

It's fun to be with the Santa Claus

Inter NGO Sports Meet Organized by CIF

"Khel Khel Mein," a sports meet organised by Concern India Foundation, is one event all our children look forward to. Prior to the finale, all of our children came down for practise 15 days in advance to deliver the best they have. Rina Das and Anagha Pednekar won the gold and silver medal respectively in Shot Put. Sushma Chibade and Priyanka Dawal won silver and bronze in Long Jump.

One more feather in our cap - We won the Trophy for the 9th Consecutive year

Our girls also won the Team Championship Trophy.

Our girls did it again

Lecture to Deal with Exam Anxieties

The goal of this workshop was to help build skills necessary to handle exams and the fears associated with it. This lecture was delivered by SMILE President Mrs. Anaxi Shah. She spoke about how they could improve their memory powers by just studying small portions of material well in advance to avoid last minute burdens such as stress. She spoke to the children about tricks for preparing small and long answers, how they could better concentrate, maintaining appropriate eating habits, etc.

Essay Writing

On India's Republic Day, we had very few children at SMILE due to our partner schools holding festivities for the children as well. This year we organized an Essay Writing Competition for the kids. The kids in lower grades were asked to write on the topic "If I Were the Prime Minister of India for a Day" and the senior class students were asked to write on "Sacrifices Made by Our Indian Freedom Fighters."

Manoranjan Mela

Every year The Rotaract Club of H.R. College, in association with the Rotary Club of Bombay, invite our children to have an entertaining day out. Manoranjan Mela – Fun Fair especially for children from various NGOs, was organised at Charni Road. The fair had various games, food stalls, tattoo making stalls, magic

Fun in the sun!

UDAAN

shows, and musical performances to amuse the kids. Our children enjoyed every bit of what was in store for them.

Yummy prizes at stake!

Visit to Nehru Centre

Children learn more when they participate in hands-on experience in the world rather than memorizing textbooks in a classroom. We express our gratitude to Tata Consultancy Services Ltd. for taking our children to Nehru Science Centre and Nehru Planetarium to have some live experience with the diversities of science and mankind. Children were thrilled to see videos of spaceships that had been sent to the Moon and Mars. They also saw a video of how stars are formed as well as the various huge constellations that exist in the universe. There was also a program entitled "Who are WE" which included the history of how India formed and the various diverse cultures India exhibits. Some of the other activities the science centres presented

Our students enjoyed the company of Tata Consultancy members to the Nehru Science Centre

UDAAN

included the story of the primitive age man, the life history of Jawaharlal Nehru and the journey of Gautama Buddha from birth to death. There were also many other presentations that went into elaborate detail which the students were intrigued to hear about.

The visit indeed was an enriching one. Every child went home with a tank of knowledge to share with their family and friends.

Our students enjoyed the company of Tata Consultancy members to the Nehru Science Centre

Croma Corporate Award Night

Only when one appreciates the talent of a child will he be encouraged to pursue that talent. Infinity Retail India Ltd. popularly known under the brand of Croma provided this wonderful platform for our children to showcase their graceful dancing skills. Our dancing diva, Jay Chibade, choreographed dance steps to our Ganesha welcome song for our children.

Moment of pride and honour for SMILE

Grace comes to us because we are taught professionally by our SMILE's dance teacher

and appreciated for their talent. They had a once in a lifetime experience performing at such a big event.

At the event, we were also gifted an LED television for SMILE's UDAAN centre.

Children perform at Croma's Corporate Award Night Function at Taj President

SPONSORSHIP

We all only have one life, DO SOMETHING!

As a family, we recently started to sponsor a young girl through SMILE. It's something that we should have done a long time ago, but we finally did the right thing and we are thrilled that we did.

One of our donors

SPONSORSHIP

All children are born with equal intelligence, but some are not provided with the same opportunities and resources. They need an education which is the foundation for their development and growth. With these thoughts in mind, SMILE has launched an educational project called the "Child Sponsorship Project."

The sponsorship project involves working with not just the child but also their family, their school principal, and teachers. This is important as the family and school environment are primary factors that influence a child. The two main eligibility criteria SMILE looks for in order for a child to be sponsored are his/her desire to study and the degree of his/her financial instability.

Once the child has been selected for our sponsorship, the amount of money he or she has been sponsored with is directly funded to paying fees, providing educational material like books, bags, and stationery, and tuition classes, all to help the child. We employ the usage of audio-visual aids like drama, role-play and puppets to teach our children.

But it doesn't only stop at that, we also provide with them with all the resources necessary to shape their personality. This is done by giving them all the necessary tools and chances to shine. Whether it is the numerous educational workshops or outings organised, we want each child's personality to flourish. We arm them with extra-curricular activities and interests like Karate, Dance and Sports.

Today, we have over two hundred children in our sponsorship project attending seven different schools of South Mumbai in English, Hindi or Marathi medium. All of our sponsored children are heading towards successful academic careers.

It is extremely rewarding for us to see a child get educated and have a good future. Through years of experience we can proudly say that our children have been good achievers at school and at the college level. These children go out into the world as confident and independent citizens.

MONTESSORI

In India, our educational system operates via crowded government school classrooms, and teachers teaching curriculum by the book with little to no application of their learning. The situation is even worse for people who come from a lower socio-economic background.

What is required is an educational model where a child plays an active role in his or her own learning. With this mission in mind, SMILE started what is right now the only Montessori School available for the underprivileged in South Mumbai. The entire teaching process of the school is based on the Montessori principle: that student should play an active role in their learning to apply concepts learned in the classroom. The school and its teachers are AML recognised and certified.

**Your long partnership
with us has changed the
life of many families**

MONTESSORI

The cornerstones of Montessori's
Activities include:

- Education
- Exposure to Outside World and Celebration
- Working with Parents

Hand & eye co-ordination

Practical Life

Art and Crafts in session

Under this mode of educating our toddlers, we conduct several exercises and introduce material that is familiar to the child as well as an extension of their own home environment. All activities are carried out by the child under the guidance of teachers. Through this, children are able to fine tune motor movements that help in the development of social skills, independence and coordination of movement.

MONTESSORI

Some activities include: folding mats, grace and courtesy activities, pouring, spooning, pounding, cleaning plastic plates, water and sponge activities, button frames (well crow, press button, hook and eye large buttons), and various other activities.

Feeding rabbits wasn't a scary experience

Let's go Green

Our children have also done experiments with:

- Umbrellas
- Seed planting activity
- Hot and Cold objects
- Testing Bottles

Sensorial

With Sensorial, we cater to the five senses of the child: visual, olfactory, auditory, taste and touch. The children are able to define each one of their senses through this program, and with that, are more aware and appreciative of the various objects present in their surroundings. For the very same purpose, we held activities like colour beads patterns, pink tower with further exercise, cylinder blocks, brown stairs, shape tray, colour boxes, touch boards, sorting box, binomial cubes etc.

Arithmetic is taught through numerous toys and Montessori material.

Language

Flash cards are the best media to learn words!

Language is worked on right from the time a child enters our SMILE Montessori School. Language capabilities of a child are built by constant conversations with the child. SMILE staff also provides our kids with precise names for objects in our school and community. Storytelling and conversations that employ verbs, nouns, prepositions, actions, words, nursery rhymes, alphabet and tracing alphabet help develop the child's linguistic skills. Our students are eventually able to build reading and writing skills once they have learned basic vocabulary and grammar.

Arithmetic

Our arithmetic studies focus on developing the ability of the child to calculate and judge. The children are able to gradually understand values and quantities in a logical pattern. We use various math games, such as number rod exercises, to help students learn Math.

Exposure and Celebrations

Celebrating festivals allows children to enjoy special foods, sing songs, and have a blast. Festivals and events that took place at SMILE's Montessori school throughout the year include Independence Day, Raksha Bandhan, Ganesh Chaturthi, Diwali, Christmas, Makar Sankranti and Republic Day. The general atmosphere in the school also becomes festive when children are allowed to come to school in festive attire.

Rakshabandhan

Little sisters in preparation

The bond of Love

MONTESSORI

We celebrated the bond between a brother and a sister. The kids were first enlightened about the importance of the festival, 'Rakhi'. After having explained the importance of the occasion, we had our little girls do Aarti and tie Rakhis to the fellow boy classmates. In turn the boys gave sweets to their new sisters.

Independence Day

The children dressed up as freedom fighters and proudly strutted with large smiles on their faces! Some were dressed up as Jawaharlal Nehru, Lalbahadur Shastri, and Sarojini Naidu etc. For this event, our children sang patriotic Indian songs.

Little Freedom fighters

Everyone dressed in traditional attire!

MONTESSORI

Ganesh Chaturthi

We have been following the practice of taking our children to the Mandap for Ganesh Darshan. All of the children had carried a fruit & flower to offer to the Lord.

Offering prayers and taking blessing from Lord Ganesha

Diwali

Montessori children of SMILE celebrated Diwali, otherwise known as the "Festival of Lights". We decorated our class with lamps, streamers and lights. All of our themes described the Diwali message of renewal and starting new endeavours.

Enjoying the festival

MONTESSORI

The celebration concluded with bursting fire crackers and a class party! All the students enjoyed the celebration thoroughly. Wafers, traditional sweets, stuffed toys, biscuits, cake, crayon boxes, chocolates and some fire crackers were given to every child on their way back home.

Always be careful while bursting crackers, safety comes first

Makar Sankranti

When it comes to enjoyment for kids at this kite flying festival, they often relate it to kites and the thread. SMILE distributed kites and threads to each child as a symbolic value of festival along with packet of traditional Tilgul Laddoo sweets.

Me and my Big Colourful Kite

MONTESSORI

Republic Day

SMILE's Montessori had a Tricolour Morning on Republic Day. All the kids dressed up to represent different religions in India. They also dressed as farmers to represent India's 70% agricultural population. All of our children sang patriotic songs and relaxed for a fun day. They played a few games that included racing and musical chairs. All the games had prizes, even a prize for the best dressed.

I am an Indian!

Graduation Day

SMILE conducted its Montessori Graduation Ceremony to upgrade the tiny tots of Montessori to the next level of education: the primary sections of schools. The event was centred on improving the parent/teacher relationship. Parents of our SMILE children expressed how satisfied they were with SMILE's Montessori Teaching Method and how well it had worked for their child.

A proud little munchkin with our President Mrs. Anaxi Shah

MONTESSORI

This was then followed by cute performances by these little artists. They danced to Bollywood songs and then played games. All the children went home happy having attained great results in school.

My Montessori Graduation

Beyond the Classroom

We had two trips this term for our budding explorers. We have held trips to the park in search of bugs, organised picnics, and even administered races and games. We also conducted an educational tour of the Taraporewala Aquarium this year.

Field Trip to Kamala Nehru Park

Gardens grow curiosity. Our trip to Kamala Nehru Park sparked every child's curiosity and imagination about trees and the natural world. All of our kids had a joyous evening at the park. They started with having fun at the large shoe. This was followed by games under the trees. Truly a fun day at the park!

MONTESSORI

Visit to an Aquarium

This year, we took our kids to the famous Taraporewala Aquarium situated on Marine Drive. The kids were mesmerised to see the beauty of the underwater world. They were spellbound at the variety of the fishes and other aquatic animals they saw.

Time to watch the lovely fish!

Working with Parents

Parents' Meeting to keep them updated about their children's progress

Parents are the bridge between what a child learns at the school and what he learns at home. Hence not merely teachers but both the parent and the teacher become collaborators working together to support a child's growth and learning.

We organize various educational meetings which are designed to help parents understand the concepts and philosophy of Montessori learning. Coming from a basic-educated background, they are given a brief overview about what the child will learn at school and the benefits of a Montessori education.

Parents' meeting are conducted every quarter to give parents the opportunity to discuss the development of their child. These meetings are conducted by the Montessori teacher and involve samples of the child's work and discussion of the curriculum appropriate for them.

SMILE's project UTKARSH aims at helping underprivileged women break free from their cycle of poverty and financial dependence on family members. We teach them valuable practical skills in order for them to earn a living. As a part of this initiative, we conduct various workshops to encourage their talents and help them develop new skills to further supplement their income. This is done through our Income Generation Program where, after receiving vigorous training, finished products and goods made by our ladies are sold at exhibitions. The money collected from the sales is then given to these ladies for their hard work and commitment to make an earning.

Besides this, we also provide counselling and support to women when they are struggling, left to take care of themselves, or are stressed out. Health and entertainment are taken care of through our other programs as well.

All in all, Project UTKARSH gives our women a voice and a support network to nurture their hopes and ambitions, allowing them the freedom to work towards their own individual dreams.

Self Defence

One of the many new initiatives that we took up for women this year included self-defence classes. The focus of this training was mainly to do with women taking charge in life's difficult situation like robbery, physical attacks, and threats. Under the guidance of Sadanand Padma Sir (one of the reputed instructors from Yudanshakai Karate International), twelve women underwent this intensive course for a period of two months. They were taught various exercises of this form of martial arts and meditation.

Besides this, meditation has helped them to become more positive towards every approach in life.

Dance Class

Dance has been therapeutic media for our women. They found it not only entertaining but also a break from their daily routine and stressed life. For them, dance has now become their stress buster.

Dancing along to the rhythm

Yoga Class

Yoga classes have been conducted by Mickey Mehta for the betterment of our women's health for the past four years. Eight women have dedicated themselves to yoga class. They have been relieved from joint pain, back pain and leg pain. They have also experienced a significant loss in weight. Overall, our women in the program are more at peace with themselves, mentally prepared to face the challenges of their life, and significantly more confident.

Relieving stress through yoga

Picnic

Having a blast at the picnic!

To get a whole day free from the daily routine was bliss for them. SMILE had organized a break; a picnic for women to Picnic Spot at Goregaon, Chota Kashmir and Aarey Colony. Starting the day with Picnic Spot, all the women were given breakfast on reaching there. After a wholesome food break, all ladies indulged themselves in games like Lagori and Kho-Kho. The women enjoyed boating and a round of Dashing Cars at Chota Kashmir! This was followed by a visit to the Aarey Colony and it ended with some tasty South Indian Food at Café Mysore.

Kaun Hai Jo Sapno Mein Aaya

Like every year, Rotary Club of Bombay Central invited our women and Senior Citizens to enjoy a live musical program at Amar Gian Grover Auditorium, Lala Lajpatrai College, titled Kaun Hai Jo Sapno Mein Aaya. The entire musical concert was a tribute to the songs of Rajendra Kumar and Vijayanti Mala.

Senior Citizens having fun at the concert

A memorable day for all!

Our women and senior citizens enjoyed the program mainly because of the feeling that they got of being an audience to a live musical concert. Miss Pia Bhagi made the program more exciting by giving our women ice cream, tea, snacks and lunch box during the program. The program was like a stress buster for our ladies, where they got a melodious break from their routine stressful lives.

Haldi Kumkum

The only Indian festival that caters to the feminine need to dress up is celebrated at SMILE year after year. The traditional rituals remain the same, what changes are the elements of fun that is different each year. This year we had organised Antakshari for our women. After getting divided into four teams, we played four different rounds of the game. All of them were experts, each team better than the other. At the end we had none of the teams losing; everyone was a winner! After the game, all our women began the traditional ritual of celebrating the festival. They exchanged Haldi and Kumkum as a mark of their marital status.

At the end of the festivities, the women were treated with snacks and refreshments. All of the ladies were given gifts to take back home.

Diwali Party

Diwali party has always been celebrated as a grand party for both the children and parents together. Parents were given ration, sweets and snacks to celebrate the occasion. The entire program was sponsored by Inner Wheel Club of Queen's Necklace, and we were also graced by their presence.

To make the entire event a fun filled occasion, our parents performed short comic skits for the audience.

Celebrating Being Happily Married

Navratri – Dandiya Program

This exhilarating and inspiring festival is a celebration of Good over the Evil throughout the nation. The event organised for our women included music, food and colourful wooden Dandiya sticks needed for Dandiya Raas, one of India's traditional folk dances. The celebration began and ended with traditional dance of Garba to pay tribute to women's empowerment in society. Movements in the dances included performing in circles, striking Dandiya sticks together and coordinated hand movements.

A competition based on Best Performance, Best Dancing Pair and an All-Rounder performer was organised to increase the zeal of the women participating. All women had dressed themselves in colourful outfits of Chaniya Cholis to enjoy and celebrate the festival in its true spirits.

Getting ready to strike different Dandiya and Garba poses

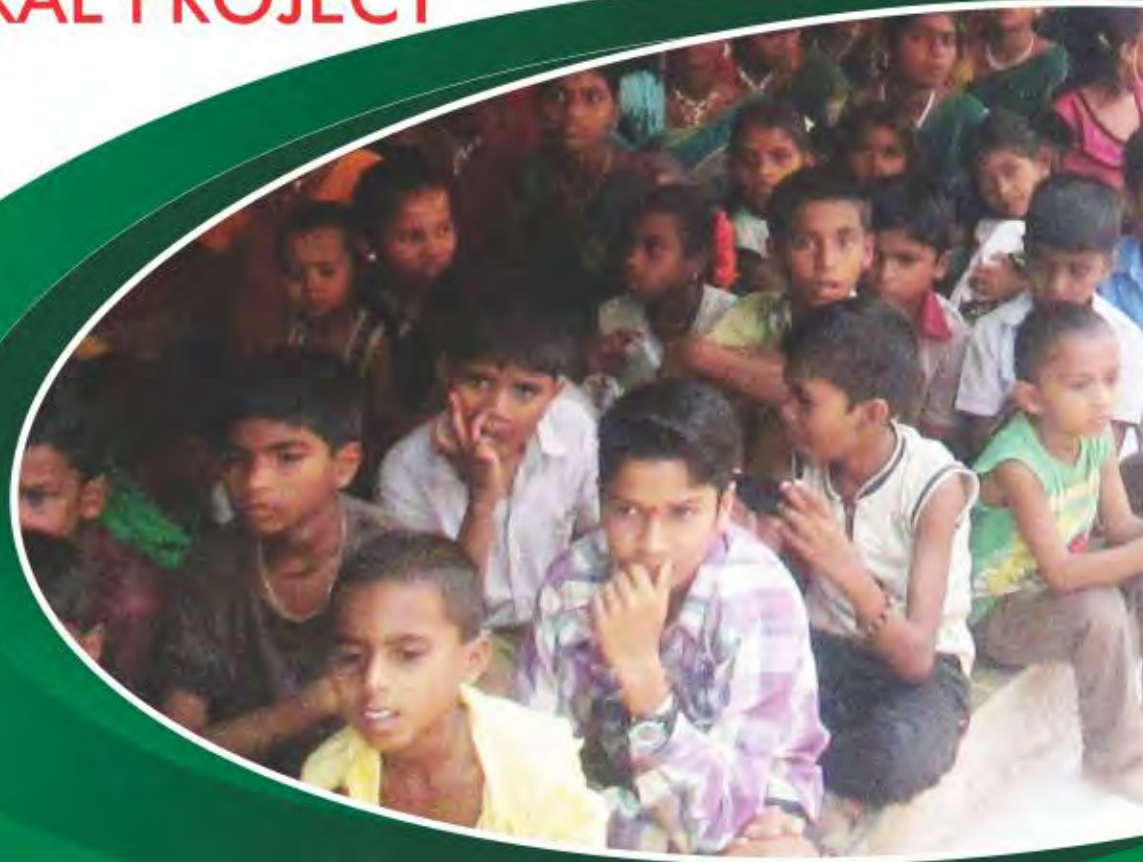

Cake Workshop

SMILE organised an Eggless Cake Workshop with Dimple Shah to teach the women of UTKARSH how to bake their own eggless cakes without the need of an oven. She then began to demonstrate how to bake your own eggless cake in a cooker to all the women.

Who needs an oven to bake!

RURAL PROJECT

Education is a very basic and important necessity. However it is not appropriately addressed in rural India. SMILE through its extensive research found out about the various problems faced in rural education procedures and decided to take action. These problems ranged from school officials who were unhappy with the infrastructure and amenities, to parents who weren't well educated enough to understand the need for an education for their children. Educational standards in rural India just weren't up to the mark.

The children may be bright and intelligent but as long as they don't receive the proper infrastructure necessary to shine in an educational environment, then all of it goes to waste. SMILE faced a lot of challenges in its path. Parents who weren't convinced that their children would do well in school, incomplete school structures, unplastered classrooms, and dilapidated furniture. Schools didn't even receive government grants that were promised to them in the first place.

RURAL PROJECT

But SMILE decided to step in and take matters into our own hands. We have now started two rural projects in Ratnagiri District (Panwal Village) and partnered with one school in Wada (Thane) as well as four schools in Gujarat. This has been a very proud achievement for us. The children are well-looked after and they are shining in their respective classrooms. Meanwhile the school trustees are happy with the refurbished classrooms and sound infrastructure provided by SMILE.

We also provided for the children's school fees, stationary, bags and uniforms. SMILE endeavours to do its best for the development for education in rural India and will continue to do so for years to come. All of this was done to ensure a smarter and brighter future for rural India!

Dermatoglyphics Multiple Intelligence Test

New Year, New Initiatives

This test is conducted by taking finger prints of an individual. This reveals the personality, learning skill, thinking style and intelligent quotient.

SMILE conducts the DMIT test and has partnered with Your Time Service.

The main objectives of the DMIT test is to solve the psycho-social problems among children, to solve adjustmental problems, build harmonious social relationships and increasing satisfactory performances in children by identifying their inborn intelligence potentials.

By DMIT analysis, we help parents understand their child's personal inborn intelligence level and their strengths and weaknesses. After the test, we provide professional intensive counselling to parents about the report. During counselling, SMILE guides parents to choose activities or careers according to their inborn intelligence (or DMIT results). We show them the strengths of their child and their personality styles and help them to better understand their child's potential. The DMIT test also serves the purpose of "building harmonious social relationships" by being able to help a parent understand his or her own child's psychology, behaviour, and performance level.

DMIT

Dermatoglyphics Multiple Intelligence Test

Adoption of School in Wada

Before SMILE revamped the school

New Lab provided by SMILE

After SMILE's Intervention

This year, SMILE spread its horizon to help a school that comprises of an Adivasi tribe and resides in Wada, which is located 40 kilometres from Thane. This rural patch in India struggles to acquire the most basic of amenities.

The school in reference, Shikshanpremi Gangaram Mahadu Bhadange Vidyalyaya, is in Vaki. The institution was established in 2008 and was granted permission by the government to be developed into a school. It educates students from standard 8th to 10th only. The school provides education for close to 200 students.

Though the school was promised grants from the government, they never received the grant money promised. Even with these financial crises, this school is the only source of secondary education of the children in the village as well as students from the nearby villages. They come to school from houses that are 4-5 kilometres away with no means of transportation. Their day starts and ends with this tiring journey to and from school. What adds to this is that they do not even have the footwear necessary to walk this long and arduous journey.

That is when SMILE decided to step in. We provided complete furnishing of the classrooms right from wall plastering to furniture restoring. Additional classrooms were also constructed to accommodate the staggering number of children who wanted to be educated. We also provided the school with an equipped laboratory and library. The school playground was revamped to make the space suitable for sports and other events that may take place.

Besides infrastructural support, SMILE also provides for the school fees, books, stationery, bags and any clothing material they could put to use. In other words, this school has been adopted by SMILE. SMILE is committed to making the school an acceptable place for education.

The wasted playground is now fully used to hold various functions
